

ROOF PAINT REFLECT WHITE

White reflective coating that renovates and cools

PRODUCT DATA SHEET

Product description

Ready-to-use white coating used to renovate both flat and sloping roofs and make them reflective.

Roof coverings treated with **ROOF PAINT REFLECT WHITE** will reflect UV rays and the sun's heat instead of absorbing it. A constant and lower temperature extends the life of the roofing. Reflection of the sun's heat by **ROOF PAINT REFLECT WHITE** results in more comfortable indoor temperatures and lower energy costs, due to lower energy consumption by cooling systems. It also increases the efficiency of installed solar panels. **ROOF PAINT REFLECT WHITE** is also a renovation coating that revitalises weathered bitumen roofing.

Application

For use on bitumen, metal, cement, tiles, slates and EPDM. **ROOF PAINT REFLECT WHITE** can also be applied to new bitumen roofs that are at least 6 months old.

Advantages

- › Keeps your home cool
- › Extends the life of the roofing
- › Increases the efficiency of solar panels

How much product do I need?

Use approx. 1 litre per 4 m² per coat.

See also the calculator on our website www.aquaplan.com.

Handy tips?

- Shake well before use.
- Store between 5°C and 30°C.
- Clean your tools with white spirit or turpentine.
- Use **ROOF PRIMER MULTI** to prepare the roof. This will ensure optimum adhesion of **ROOF PAINT REFLECT WHITE**. Roof Primer Multi also forms a barrier between the bitumen substrate and the white coating.

Material	Colour	Contents	Coverage	Drying time	Coats	Overpaintable

ROOF PAINT REFLECT WHITE

White reflective coating that renovates and cools

INSTRUCTIONS

What do I need?

How do I prepare the surface?

- Always work on a sound, clean, dust-free and dry surface.
- Apply **ROOF PRIMER MULTI** with a paint brush or roller at a rate of 0.15 l/m². Allow the primer to dry (at least 30 minutes) before proceeding.

How do I use the product?

- Apply a first coat of **ROOF PAINT REFLECT WHITE** with a paint brush or roller at a rate of 0.25 l/m².
- Allow the first coat to dry thoroughly before applying the second coat. The drying time (approx. 24 hours) depends on the temperature and weather conditions.
- Apply a second coat of **ROOF PAINT REFLECT WHITE** with a paint brush or roller at a rate of 0.25 l/m².

Usage	Drying time	Cleaning
4 L ± 8 m ²	24 hrs
